Product Ownership Analysis

What role do you play?

Business Analyst

Product Owner

Product Manager

Product Marketing Manager

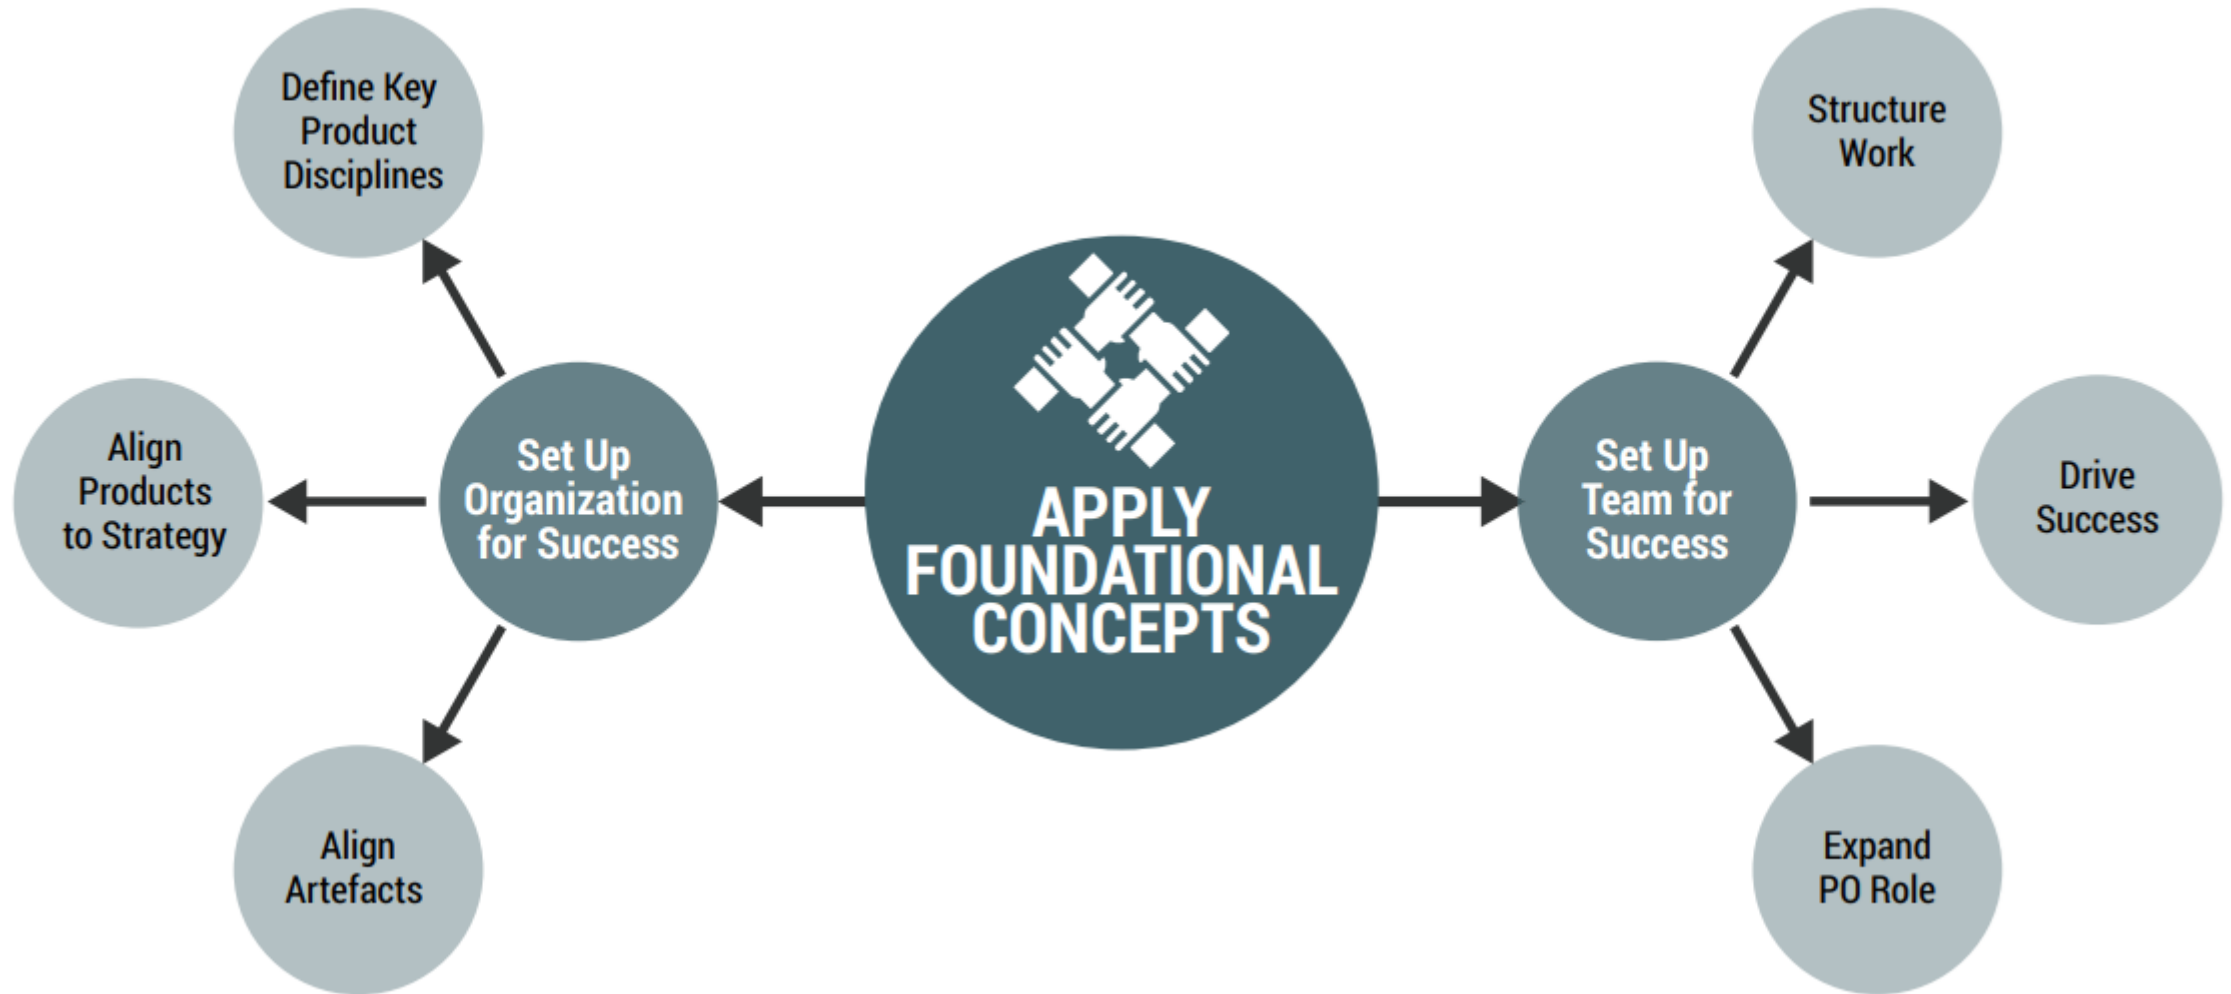

Any other roles?

Product Ownership Analysis Framework

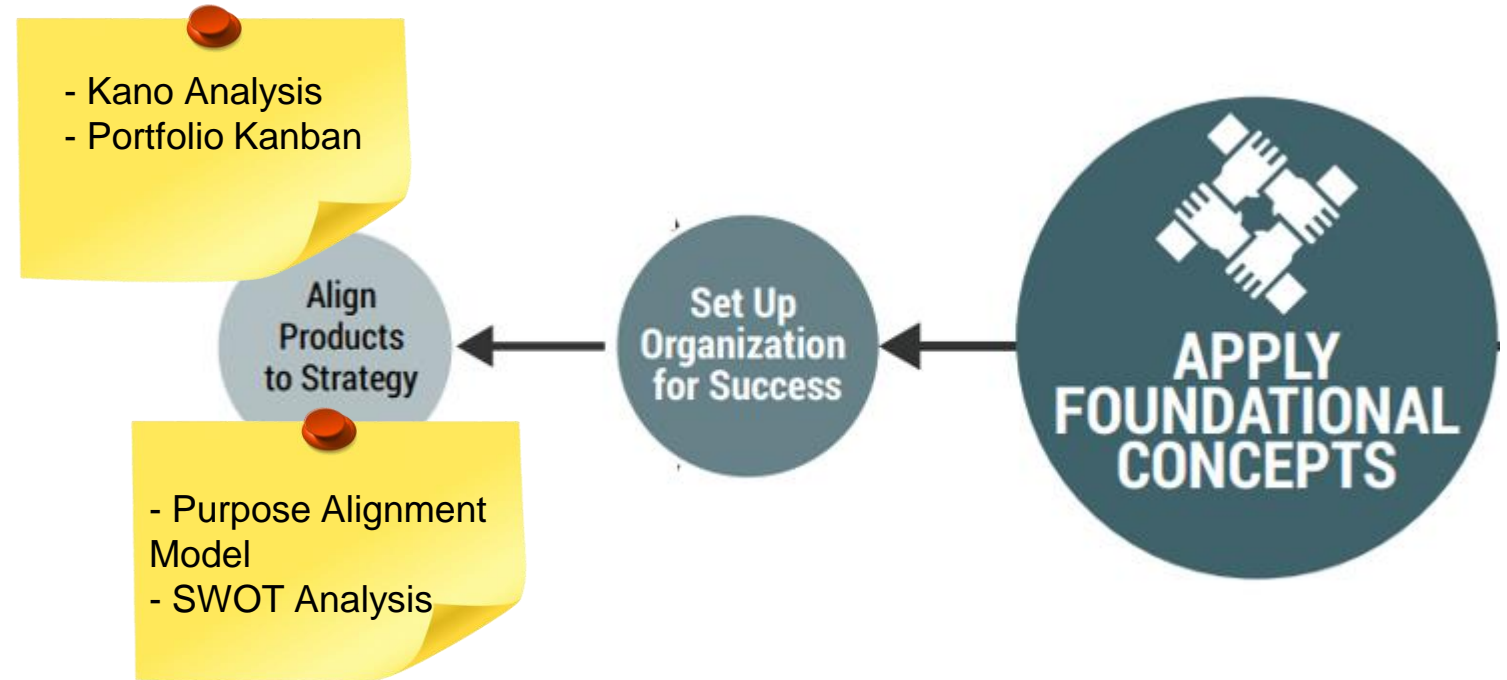

The POA framework focuses on key concepts, principles, and practices that help practitioners deliver successful products. The **seven domains** provide guidance for a team to maximize the value delivered.

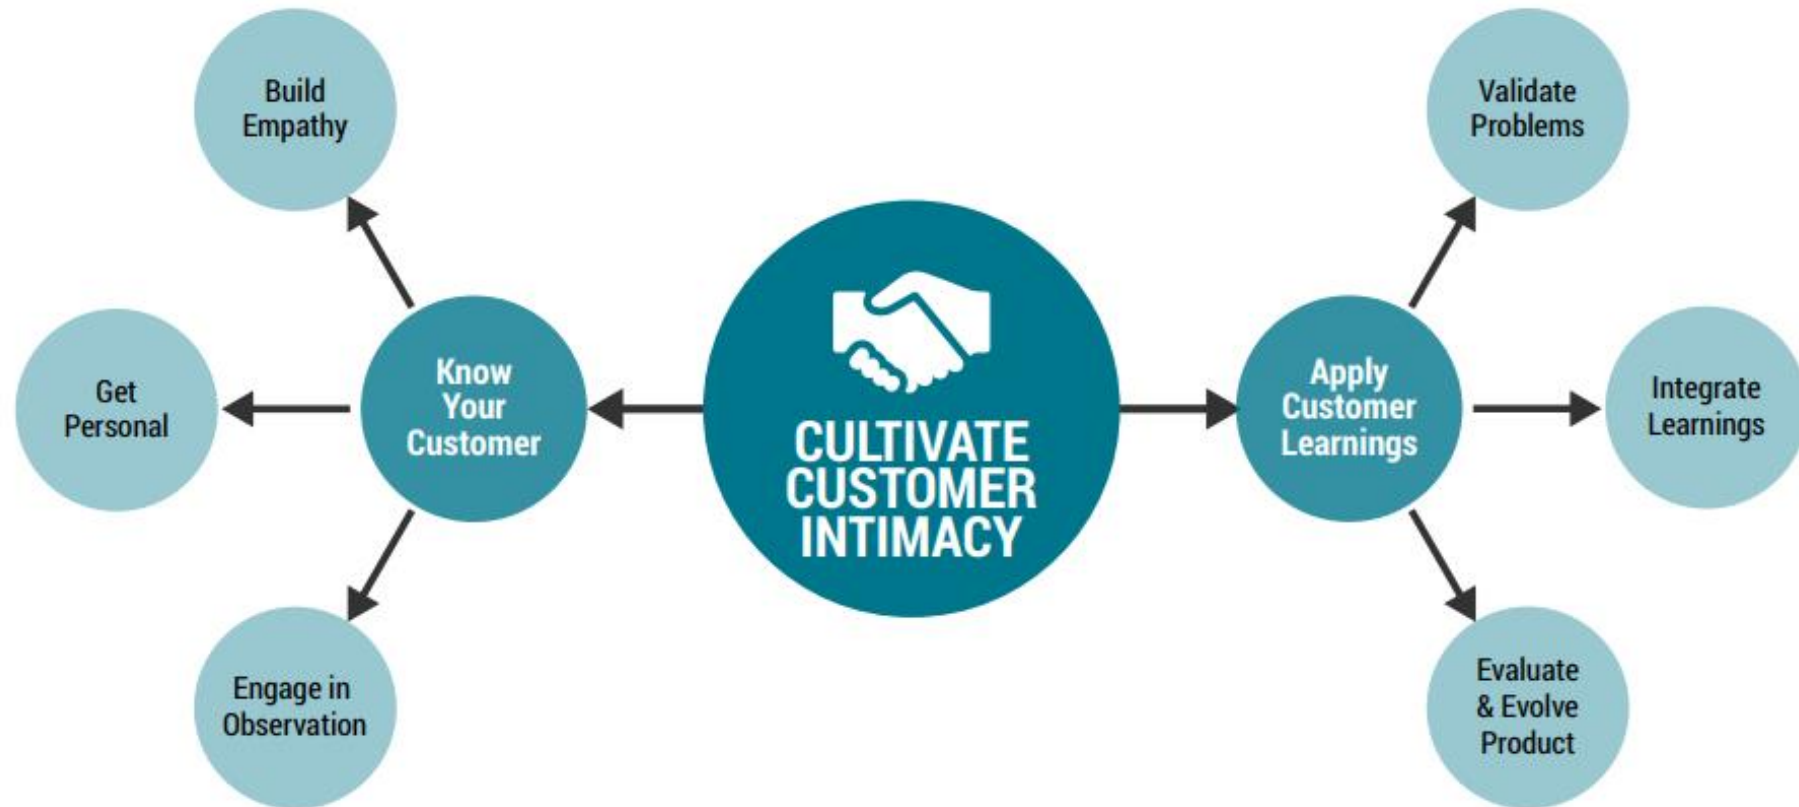

The Apply Foundational Concepts Domain

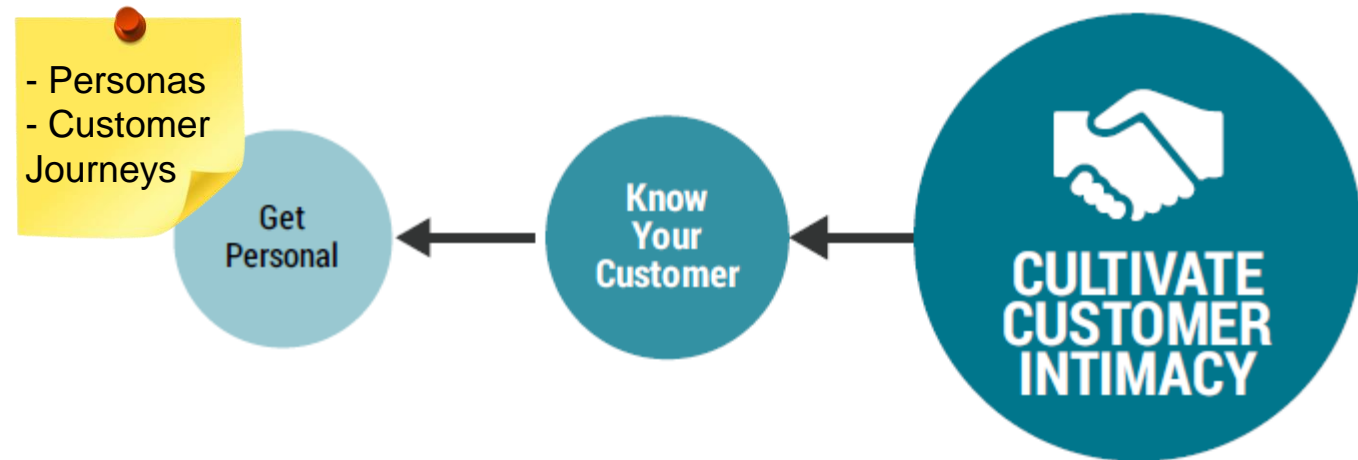

The POA Domains to Techniques Mapping

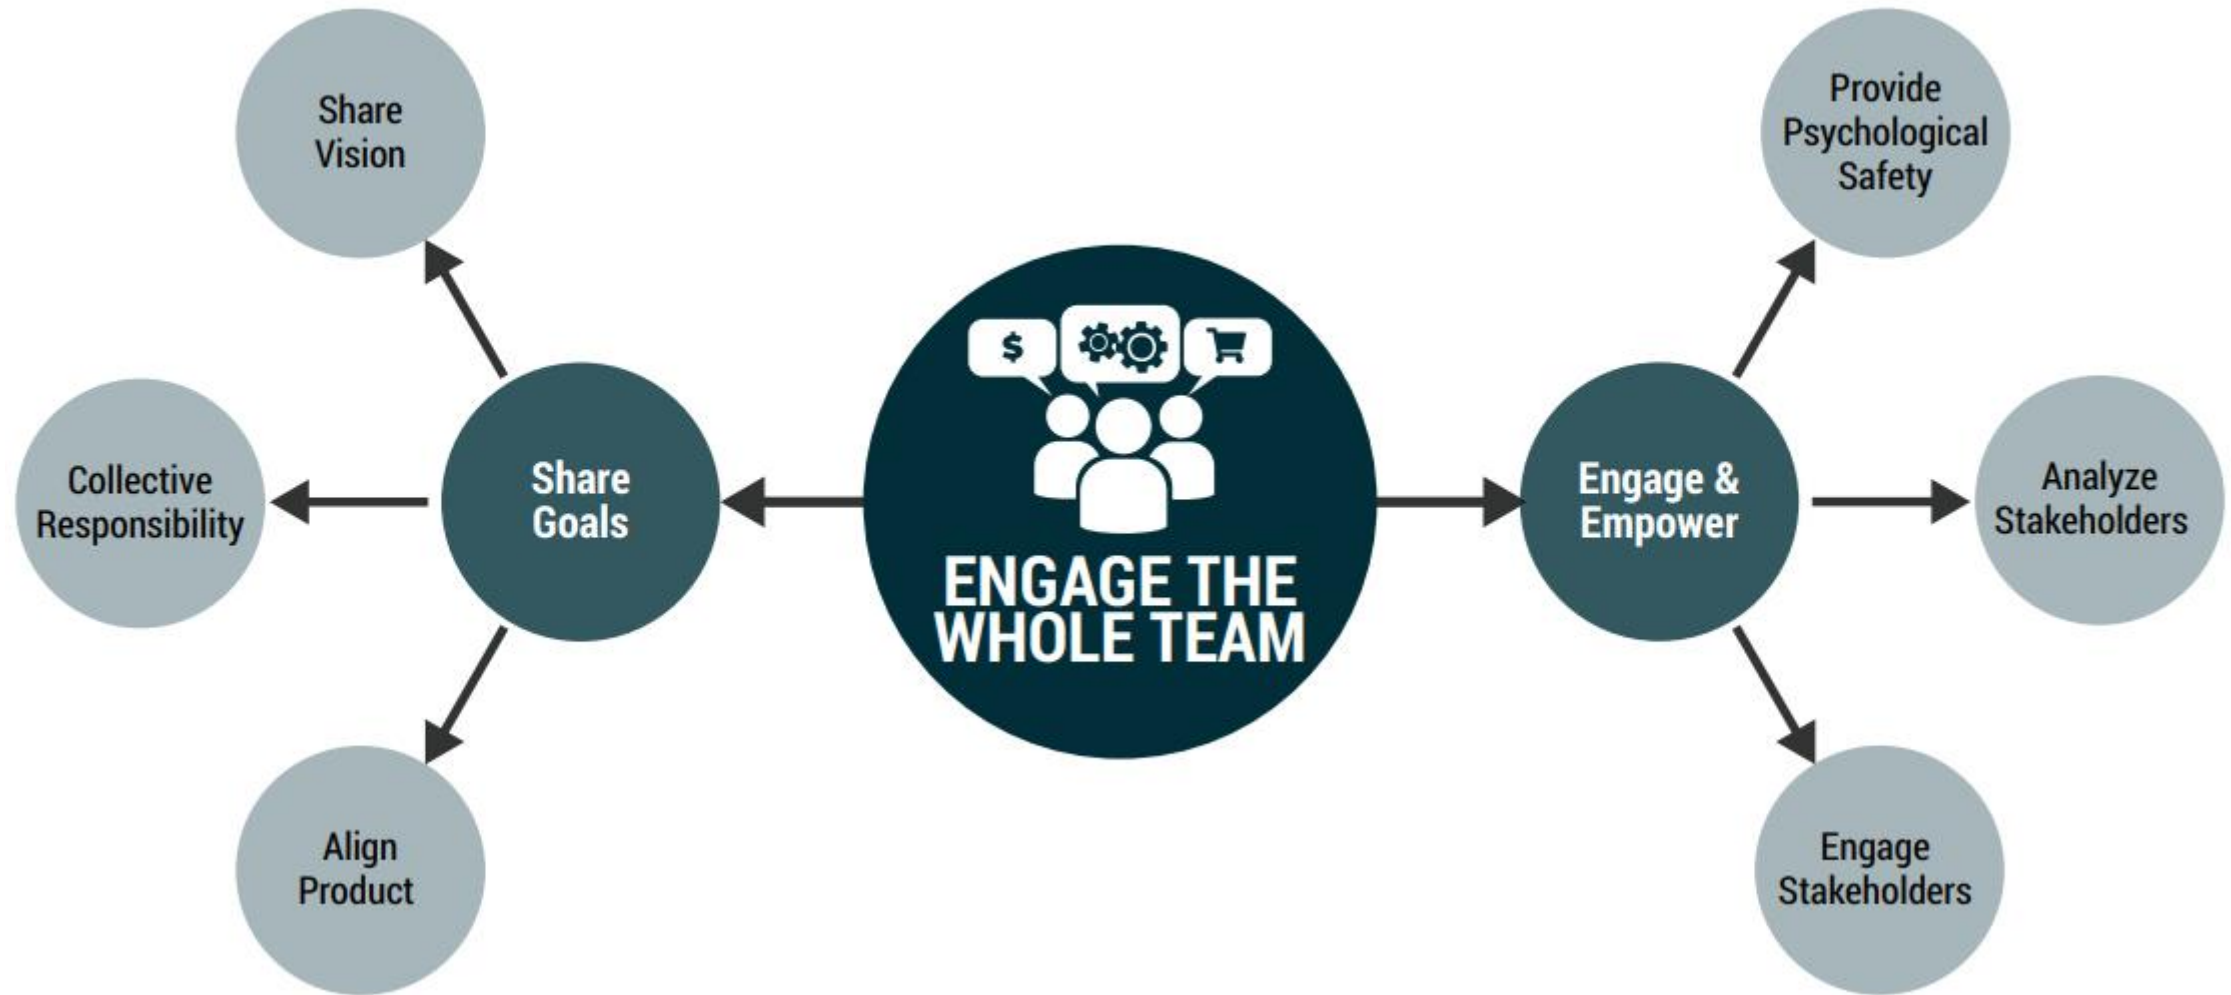

The Cultivate Customer Intimacy Domain

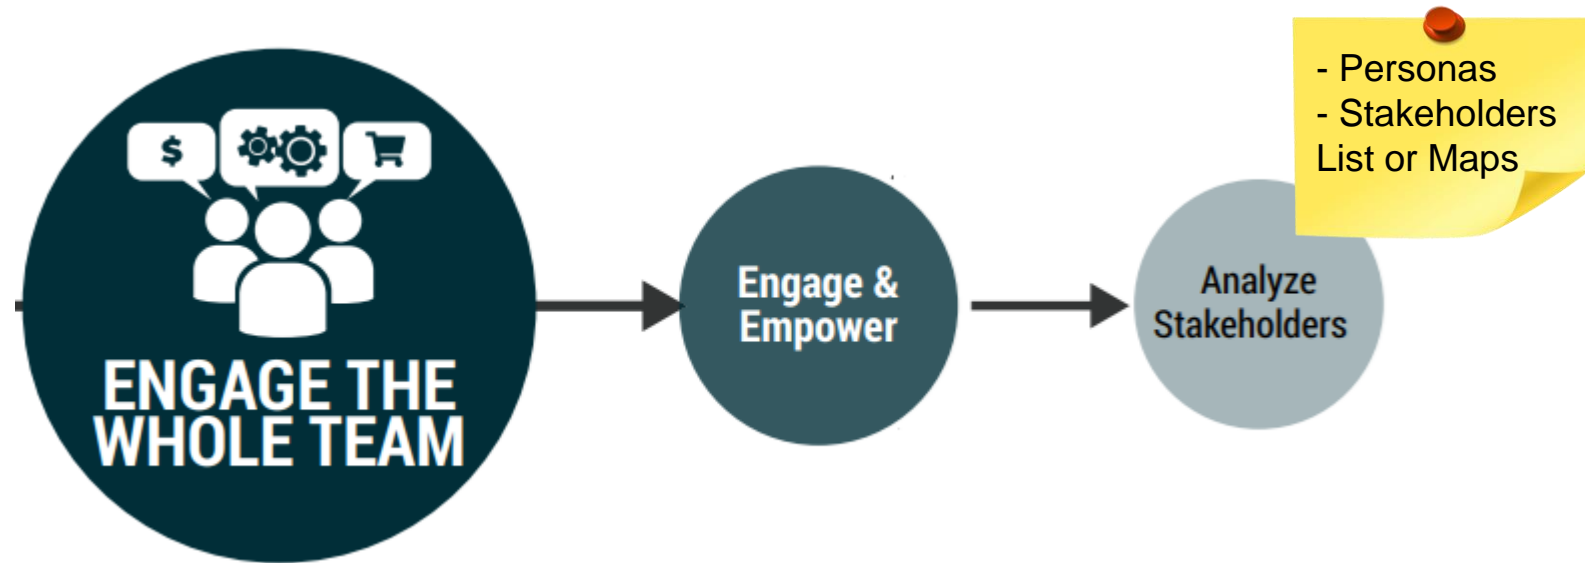

The POA Domains to Techniques Mapping

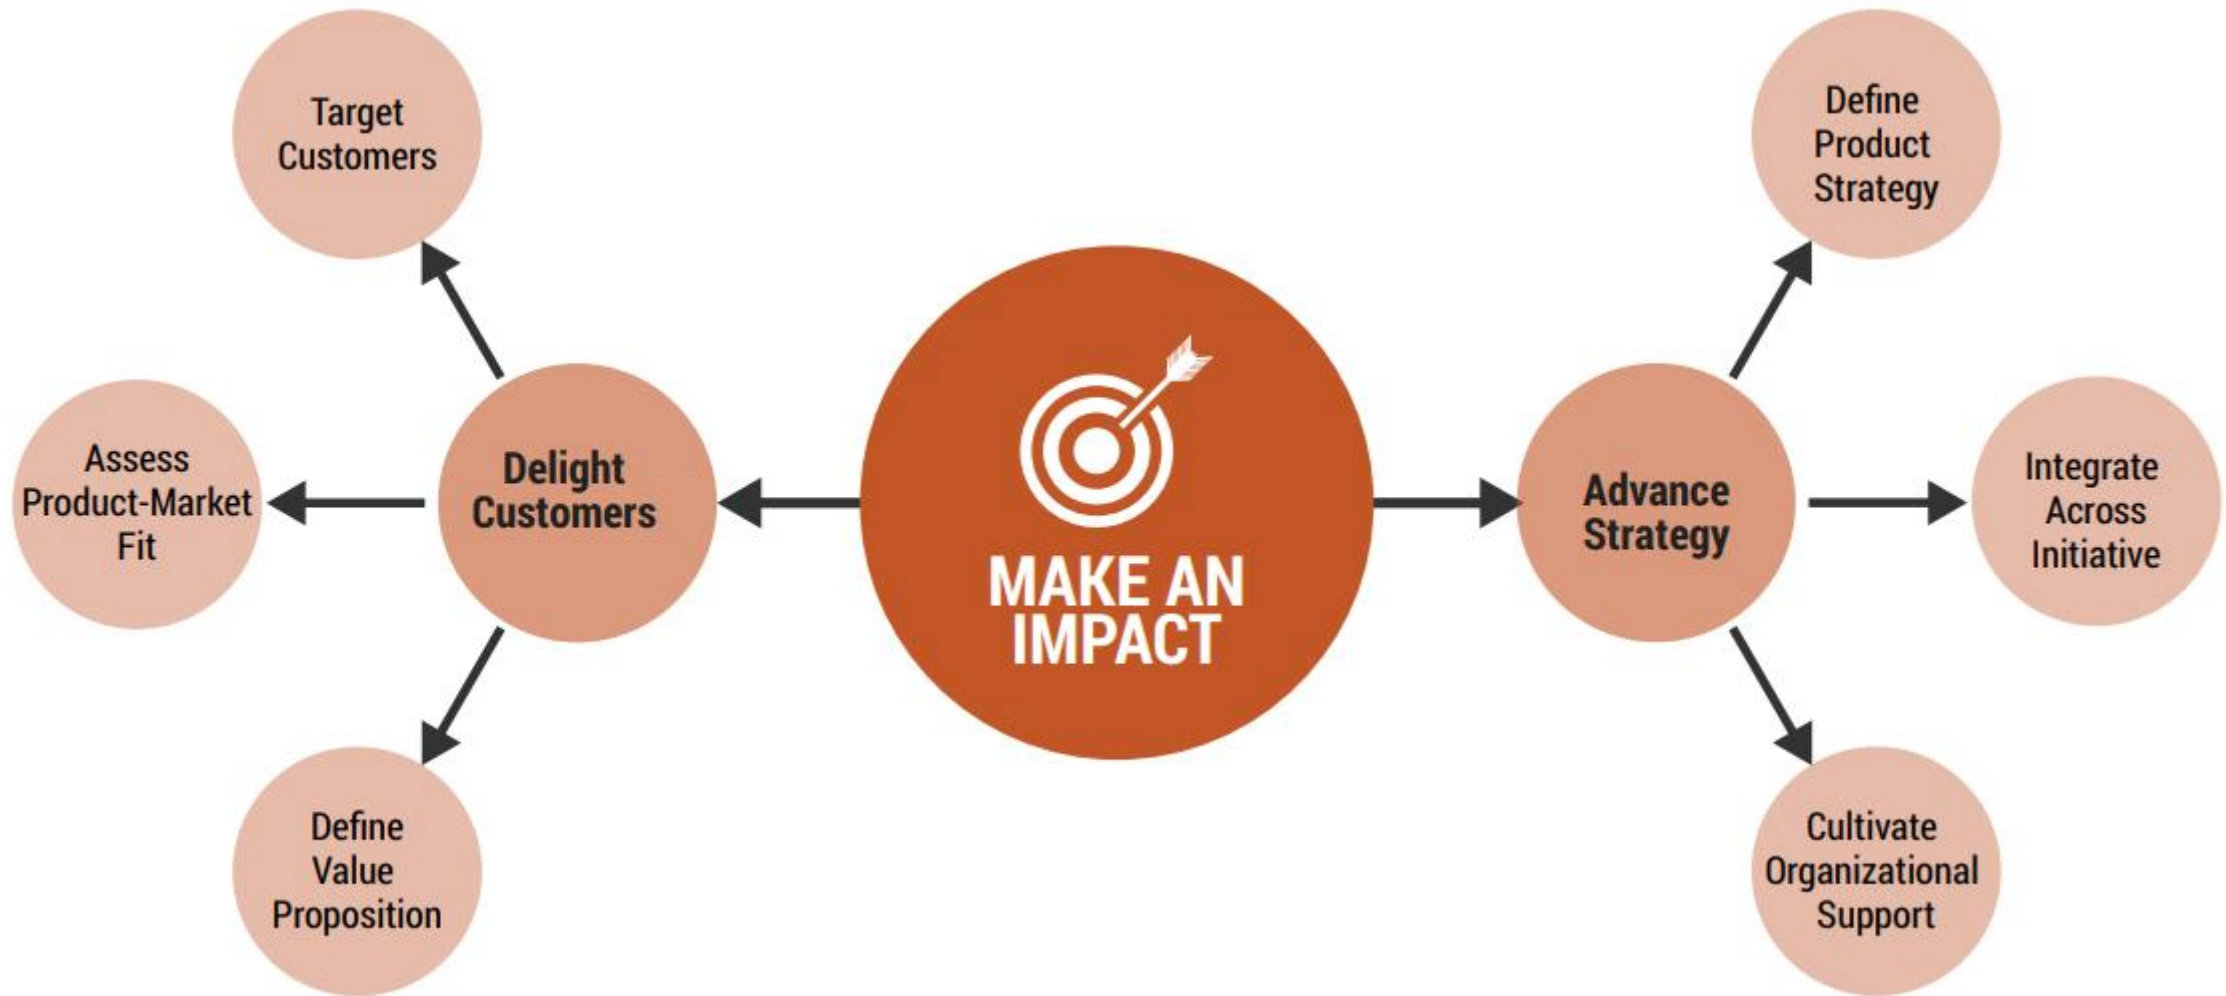

The Engage the Whole Team Domain

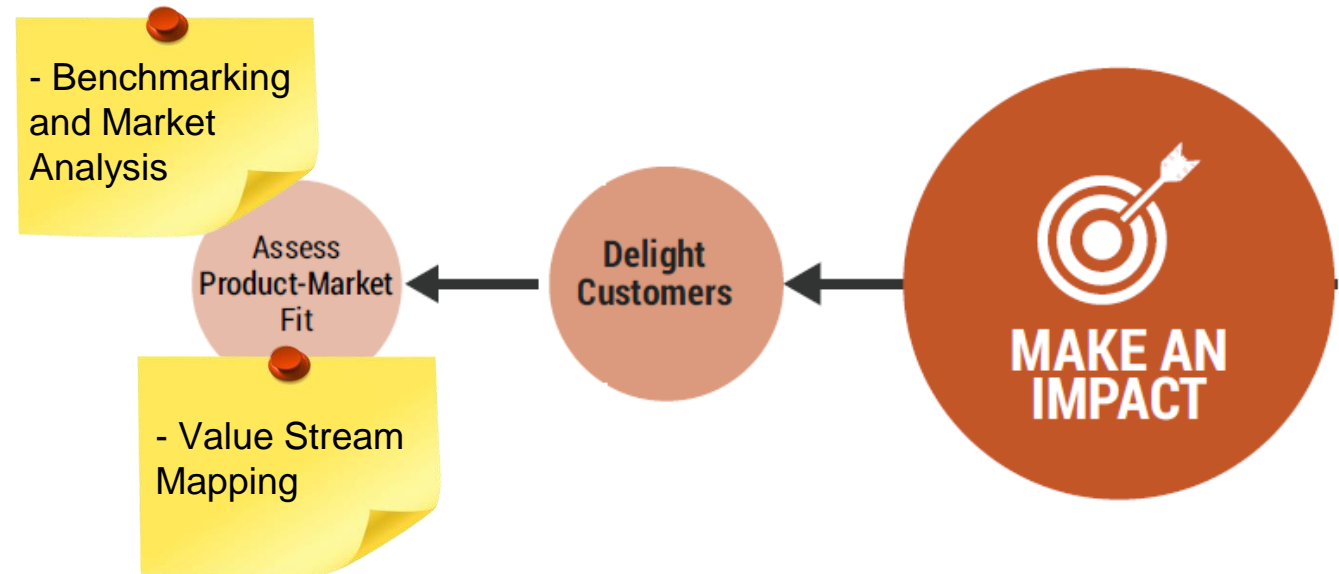

The POA Domains to Techniques Mapping

The Make an Impact Domain

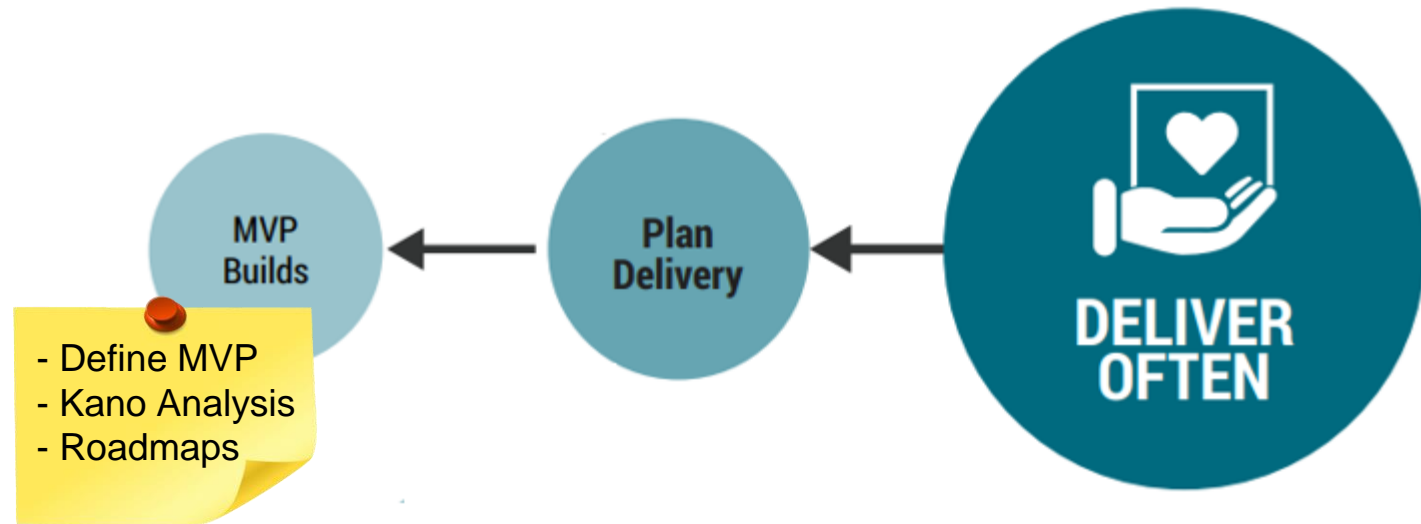

The POA Domains to Techniques Mapping

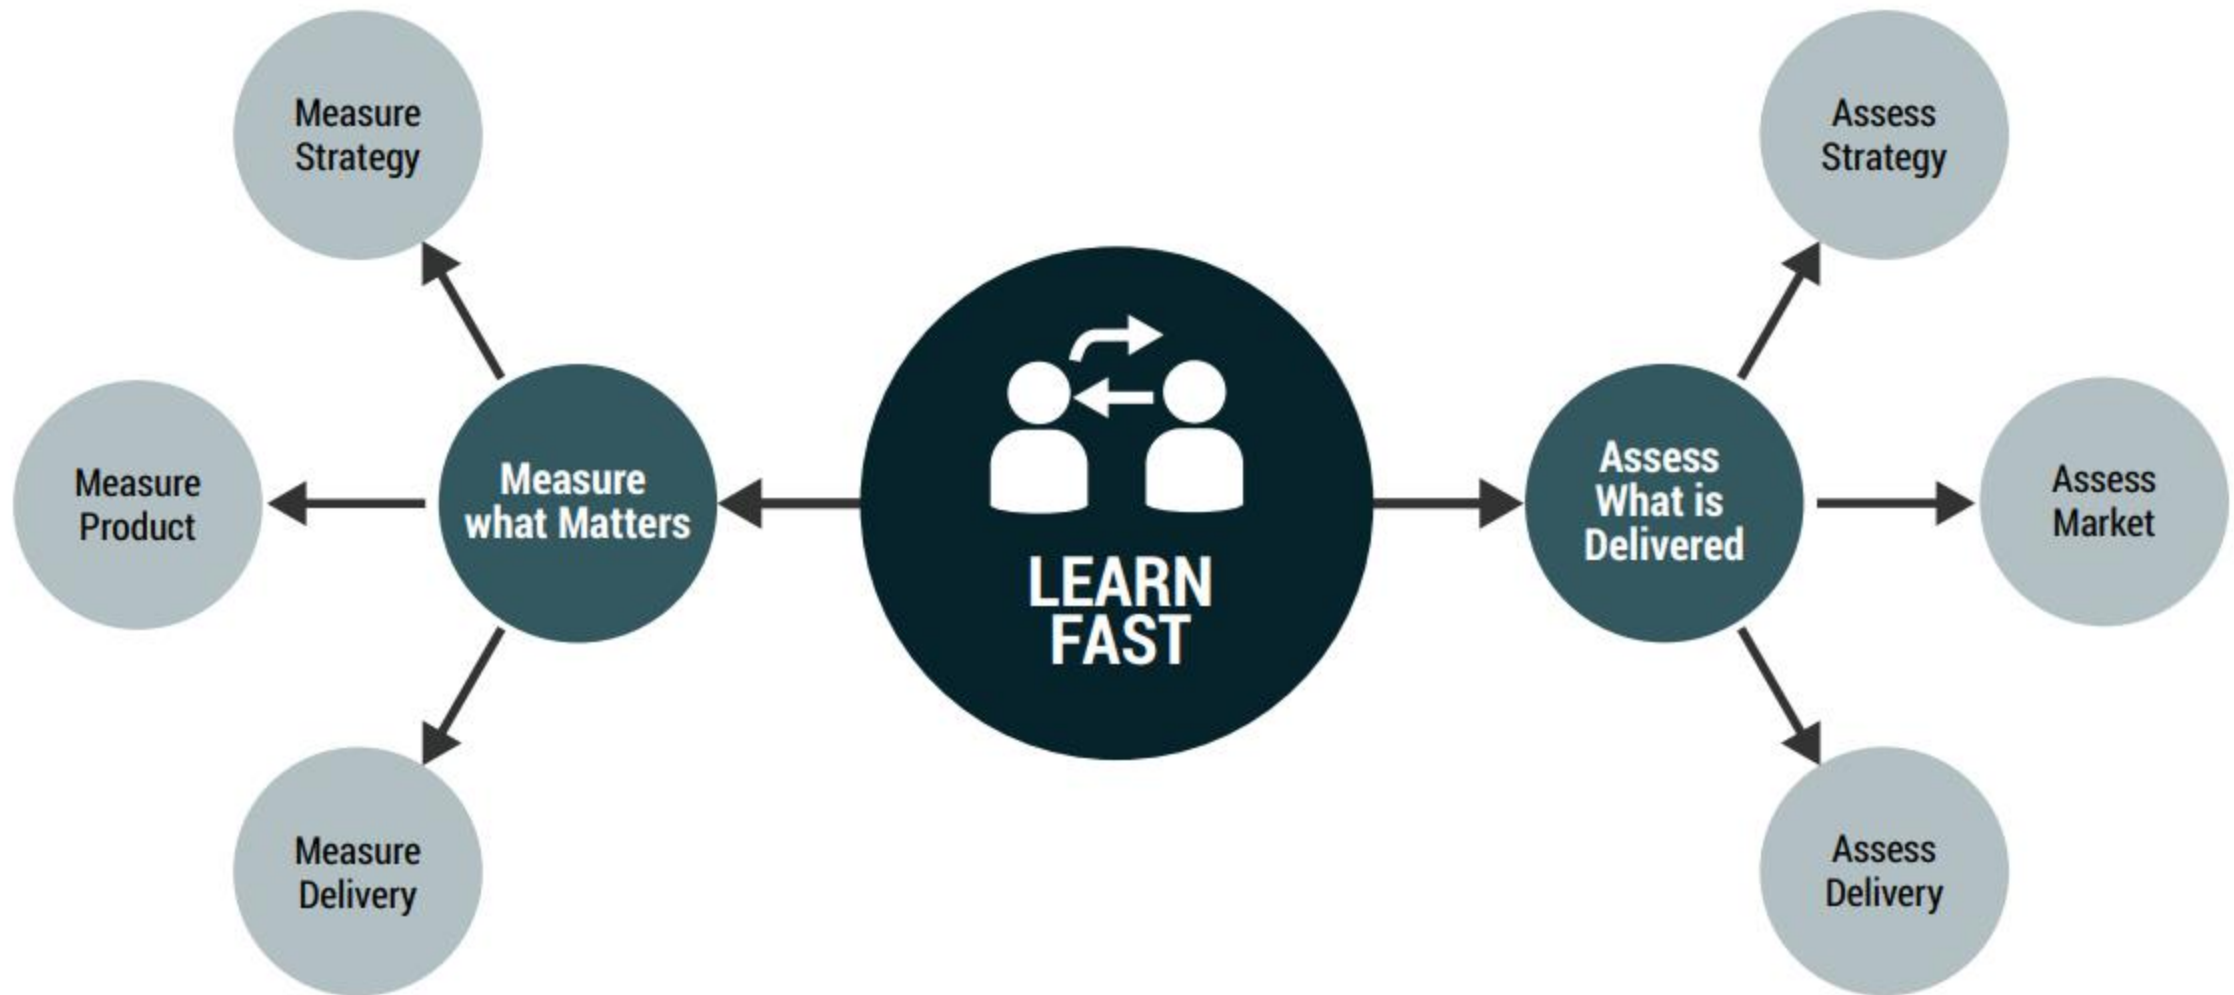

The Deliver Often Domain

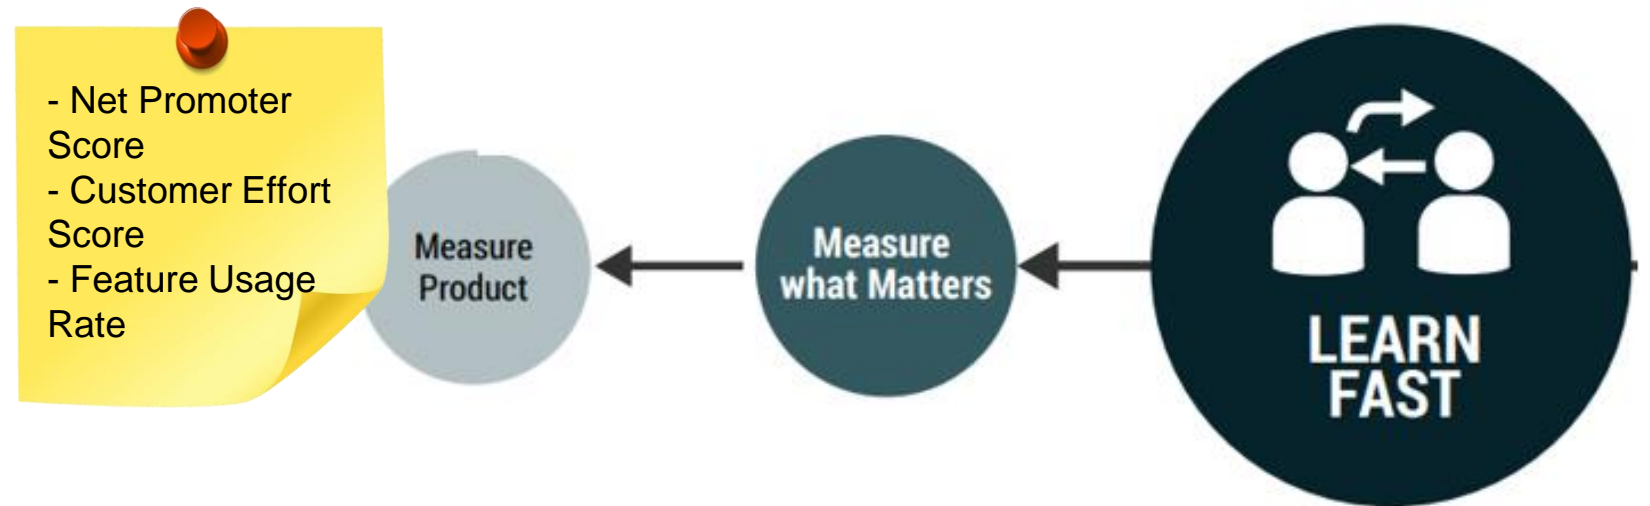

The POA Domains to Techniques Mapping

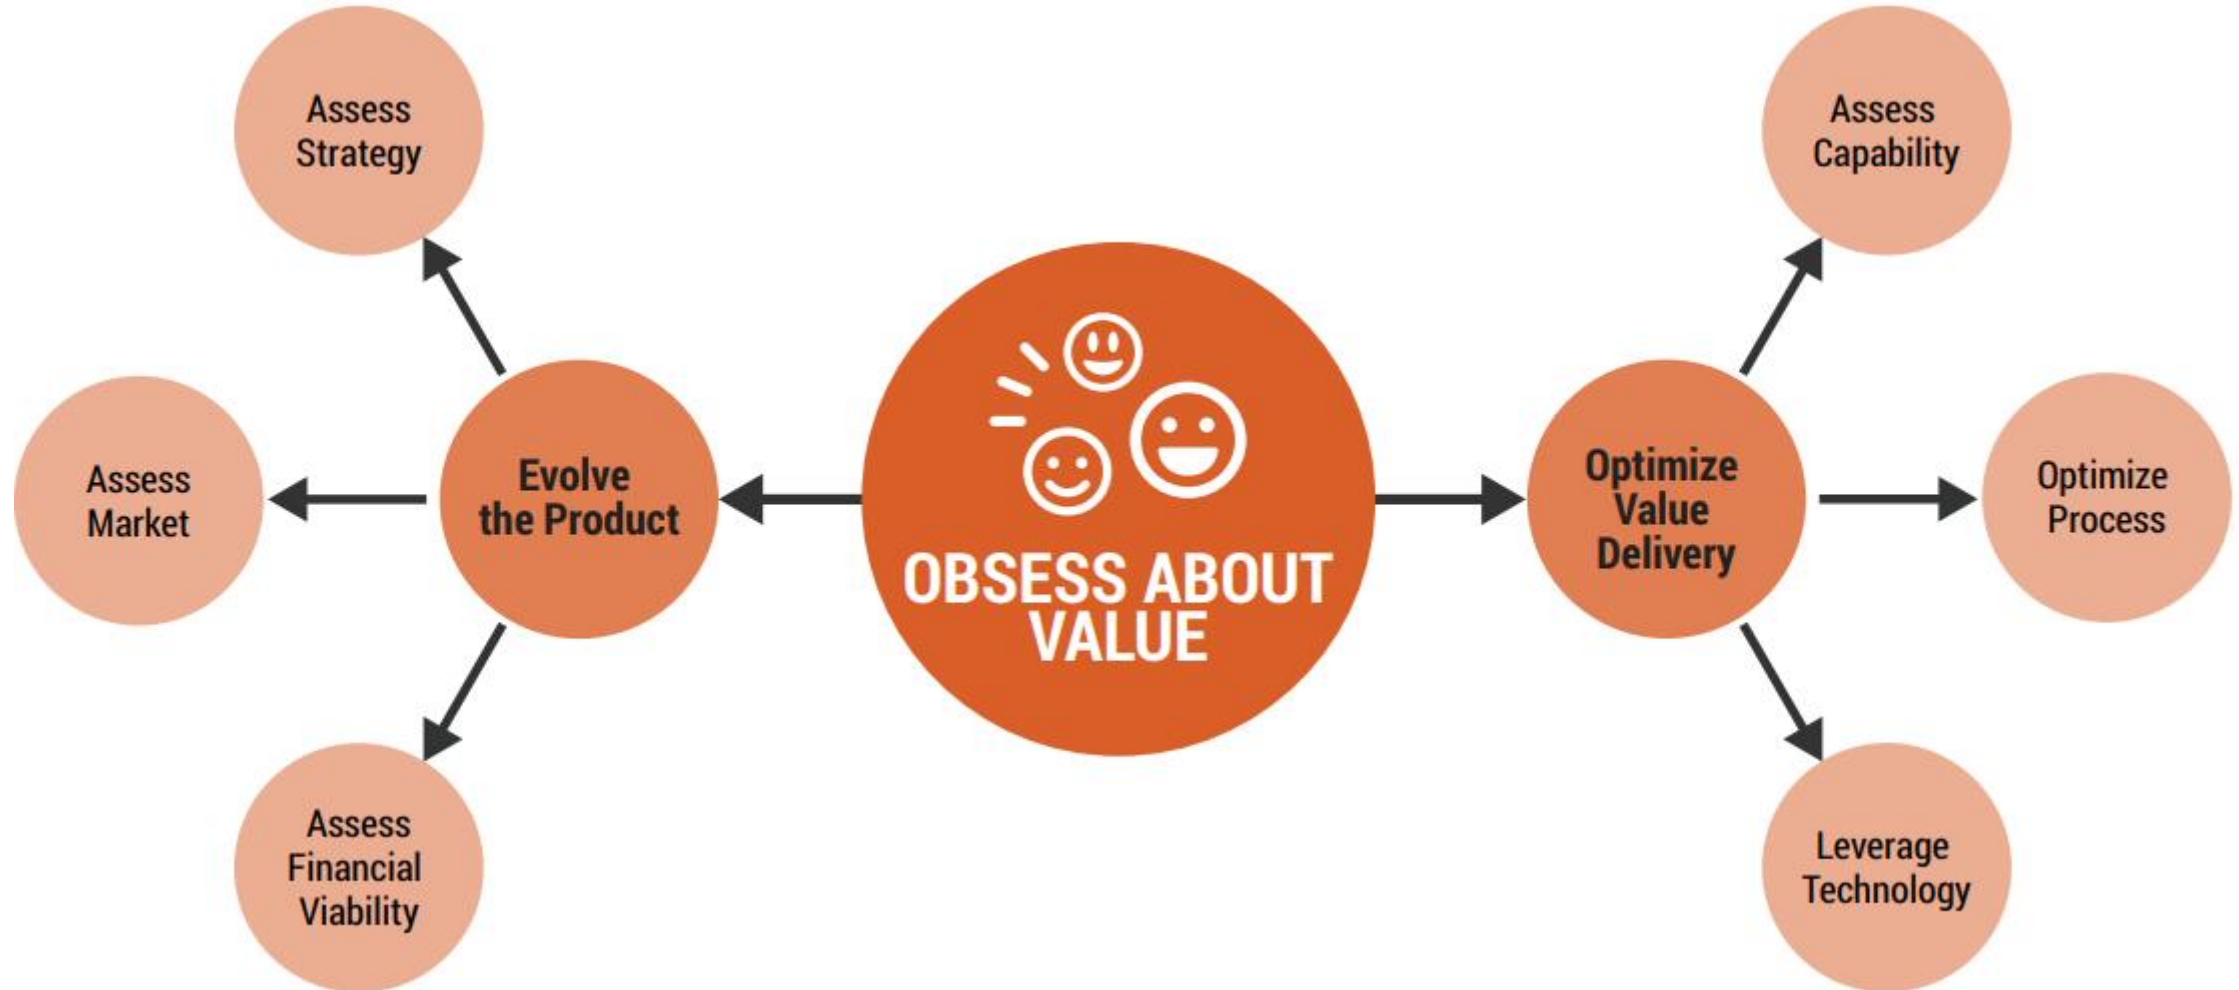

The Learn Fast Domain

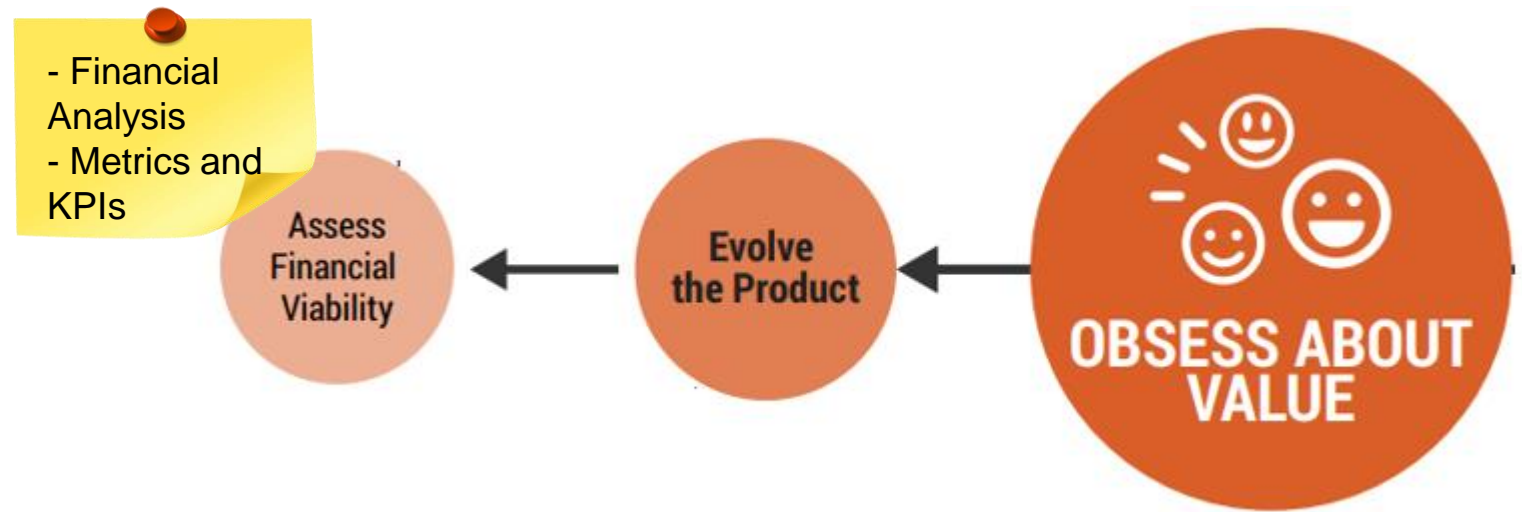

The POA Domains to Techniques Mapping

The Obsess About Value Domain

The POA Domains to Techniques Mapping

40+ Case Studies

Case Study: Customer Experience - Shoe Retailer

Background

Jen was a Product Owner at a shoe company very successful with online sales. They considered developing their own shoe brand. Given the popularity of mud running, and statistics from their sales experience, they were interested in starting with Trail Running shoes.

Challenge

Given the large number of customers, it was difficult for Jen to analyze the customer needs for the new shoe line. Jen did not know how to discover what the product features should be.

Action - Scenario

Although it is not feasible to interview all customers, it is beneficial to make personal connections with some of them.

Jen asked Peyton, a shoe customer, questions based on responses to prior questions.

The chat conversation is as follows:

- Jen: I really like those shoes you have on. Why did you choose that pair?
- Peyton (Customer): I don't know. I just liked them.
- Jen: So you prefer green shoes?
- Peyton: No, not really. I usually buy blue.
- Jen: Why did you get the green ones?
- Peyton: I like the style of these.
- Jen: What is special about the style?
- Peyton: They look cool and have the stuff I like.
- Jen: What kind of stuff do you like your shoes to have?
- Peyton: I like good arch support for rolling, good toe support for launch and good heel support for landing.
- Jen: Are there other shoes that have similar features?
- Peyton:

- Action
- Outcome
- Lessons Learnt

What we like about the Guide

It **showcases** how (based on what analysis) product people can take decisions for building the successful products.

Has **mapping** between the domains and the analysis techniques that one can use.

Has **Case Studies** that give close to real life examples and showcase how to practically apply the guide.

How to Get Certified?

POA Bundle - Digital Access & Exam
